

Thera Bytes is a Munich based company with the vision “turning play into health”. We are passionate gamers and senior industry experts. With our attitude, we are aiming at utilise the power of play into meaningful applications and games in the healthcare sector.

In cooperation with a scientific driven start-up (VC funded) we are currently developing an app which helps people monitor their memory and detect early signs of dementia. We combine science with gaming.

Become a part of our family team and join us as soon as possible as a

Backend Developer (f/m)

Your Responsibilities

- ❖ As part of a multidisciplinary development team you account for the new development of a scalable and maintainable backend based on C#
