

Thera Bytes is a Munich based company with the vision “turning play into health”. We are passionate gamers and senior industry experts. With our attitude, we are aiming at utilise the power of play into meaningful applications and games in the healthcare sector.

In cooperation with a scientific driven start-up (VC funded) we are currently developing an app which helps people monitor their memory and detect early signs of dementia. We combine science with gaming.

Become a part of our family team and join us as soon as possible as a

Technical Producer/ Project Manager (m/f)

Your Responsibilities

- ❖ You are responsible for our software and game projects regarding time, budget and quality
- ❖ You analyse the technical feasibility of a project while following a sustainable risk management
- ❖ Planning, sourcing and assignment of project resources
- ❖ Analysis of market and target group requirements and translation into project requirements
- ❖ You show your commitment to the vision and project goals and actively build an effective team with a clear, shared purpose
- ❖ You will act as central link, between management, client and your development team

Typical Challenges you will meet

- ❖ You interact with your team consisting of programmers, graphical artist and designers, taking a leadership role
- ❖ Complex design and specification documents will be derived into project goals, plans and working tasks
- ❖ You oversee the whole production process, identify and eliminate weaknesses and create a high transparency within the team
- ❖ As a mentor, you are the first point of contact for your team, supporting it with your “getting things done” mentality
- ❖ You monitor budget plans and create project reports and documentation
- ❖ You live by the methods of Agile project management and implement them in our organisation

Your Profile

- ❖ 2-5 years of relevant working experience as a producer or project manager in the field of games or agile software development
- ❖ You have a strong technical background (e.g. as programmer) or achieved a comparable education (Bachelor/ Master in Computer Science)
- ❖ Agile project management methods and the usage of corresponding tools (daily stand-ups, user stories, Jira, product mock-ups) are part of your DNA
- ❖ Excellent internal and external communicative skills (spoken and written)
- ❖ As an organisational talent, you listen to details while not losing sight of the bigger picture
- ❖ Interest for games and digital health applications
- ❖ Very good command of the English language

Bonus Points

- ❖ You could acquire leadership experience in your past positions
- ❖ Basic or advanced understanding of business processes and economic dependencies
- ❖ Experience in digital health products

Why Thera Bytes?

Our work environment is characterized by flat hierarchies, allowing for a broad range of action as well as taking on greater responsibility. We encourage you to explore new ways of problem-solving every day.

We at Thera Bytes foster core values such as honesty, transparency and respectful interaction with each other.

Based on your special aptitude and outstanding performance, we can offer the opportunity to become a co-founder of the company.

Take your chance of contributing to the success of Thera Bytes and grow with us!
